Your10and95 closing Interstate 95 southbound to Stockton Street ramp Closure will be for approximately one year

Jacksonville – Your10and95 operational improvements project will have a long-term closure of the ramp from Interstate 95 southbound to Stockton Street for approximately one year starting November 13. The closure may extend longer than a year due to weather, holidays and other unforeseen delays. As part of the project's operational improvements, crews will be constructing new dedicated Stockton and Irene Street ramps in an overall effort to reduce weaving and improve operations on Interstate 10 at Interstate 95.

During this extended closure, motorists on Interstate 95 southbound can take the Forest Street exit to Margaret Street which turns into Edison Avenue or take Interstate 10 westbound and use the McDuff Avenue exit to Edison Avenue – both detours will reconnect to Stockton Street.

Detour signs will be posted to help redirect motorists affected by the closure as follows (see attached map):

Interstate 95 southbound to Forest Street detour:

Motorists traveling on Interstate 95 southbound can take the Forest Street exit and make a right onto Forest Street then a left onto Margaret Street which turns into Edison Avenue which will reconnect to Stockton Street.

Interstate 95 southbound to Interstate 10 westbound detour:

Motorists traveling on Interstate 95 southbound can also take Interstate 10 westbound to the McDuff Avenue exit. Once at the exit, make a right on McDuff Avenue, then make another right on Edison Avenue which will reconnect with Stockton Street.

The project began in May with completion anticipated in summer 2020, depending on weather, holidays and unforeseen circumstances.

FDOT hired Archer Western as the contractor to complete this project for \$126 million.
